ESTABLISHED IN 1976, DMA is a group of Dayton-area professionals and hobbyists in the field of computing and digital information technology. General membership meetings are usually on the last Tuesday of each month. DMA has a number of Special Interest Groups (SIGs) in areas ranging from digital investing and genealogy to the Linux operating system. Each SIG meets according to its own schedule. DMA is a member of the Association of Personal Computer Users' Groups (APCUG) and the Affiliated Societies Council (ASC). Click on any of the logos—including our own (top left)—to go to that organization's Web site.

## Submissions ...

THE DATABUS welcomes compliments, complaints, suggestions, and especially articles. We can accept articles in ASCII, or as attachments in Microsoft Word or Works, Open Office Writer, Word Perfect, or, yes, even WordStar (a word-processing program that goes all the way back to about 1980!). No PDF files, please. Send articles to:

[Editor@DMA1.org](mailto:Editor@DMA1.org)

All articles are subject to editing for spelling, grammar, usage, and space. Always retain a copy of your work, as THE DATABUS cannot be responsible for loss. When articles are of roughly equal quality, those by paid-up DMA members usually receive preference.

ALL REGISTERED TRADEMARKS, for example: DMA, Direct TV, Dish TV, Raspberry Pi, or Windows are the property of their respective owners. However, the Registered Trade Mark symbols (® or ™) have been omitted for better readability. The Editor occasionally inserts comments into articles. Such comments are often in square brackets [like these] and are always preceded by the phrase: "EDITOR'S NOTE."

THE DATABUS is written and published by volunteers. We do not give professional advice on hardware, software, or network installation, repair, security, or troubleshooting. If you need expert assistance, please seek the services of a competent professional.

***JUNE MEETING:** 7:00 P.M., Tuesday, the 26<sup>th</sup>, at T. J. Chump's, 7050 Executive Boulevard, Huber Heights 45424 (next door to Meijer's —[click here](#) for a map. Come at 6:00 P.M. if you want to join us for dinner. There's plenty of free parking. (Also accessible via RTA bus routes #18 & 19, but you must take a short walk over from the Meijer's supermarket.)*

**No charge—bring a friend!**

## PATRICK CRAIG—Software for Stellar Astronomy

**T**HE BEST TIMES to go stargazing are the nights closest to each new moon. You'll be able to see thousands of stars with the naked eye compared to just a few hundred at other times. With no moon showing, the Milky Way is easily visible arching across the sky.

Using astronomy software, you will

be able to see much more and won't even need your telescope. There are dozens of quality astronomical software packages that can be downloaded for free. They are easy enough for beginners and sophisticated enough for all but professional astronomers. Patrick will have several favorites to demonstrate.

PATRICK CRAIG is a member of DMA and leader of the STEM Programming SIG. He is Adjunct Instructor at Clark State and Wright State, teaching Raspberry Pi and the Scratch programming language. **TDB**

**M**inutes are normally published almost two months late, because the Minutes for, say, the May Board meeting must be approved by the Trustees at the following month's meeting—in this case, early June. The corrected and approved May Minutes would thus usually appear in the June DATABUS (this issue), published toward the end of the month.

Time and place of the next Trustees' meeting will be announced at the General Membership Meeting on Tuesday (the 26<sup>th</sup>). Trustees' meetings begin at 7:00 P.M. and are open to all DMA members. The Trustees usually meet for dinner beforehand at a nearby restaurant that will also be announced at Tuesday's meeting. Those wishing to dine with the Trustees should come at 6:00.

## MINUTES—DMA BOARD OF TRUSTEES

### Meeting of Monday, May 7, 2018

#### CALL TO ORDER

The meeting was called to order at 7:19 P.M. by Gary Coy.

Trustees present: Gladys Campion, Gary Coy, Pat Flynn, Debra McFall, Ken Phelps, Ed Skuya, Gary Turner Excused: Peter Hess Absent: Brent Kerlin Others: Mark Camden, Patrick Craig

#### OFFICERS' REPORTS

**President**—Gary Coy

Except for the communications glitch, Bob Gostischa's presentation on PC protection went well, plenty of interest by attendees. Thanks to Gary Coy for use of his hotspot.

**Vice President**—Peter Hess

Jay Finley cancelled the Genealogy meeting for May. When he tried to reserve the room, the library insisted he provide more information, including the DMA Employer Identification Number, to avoid room charges. Jay is considering a move to the downtown branch.

Dan Boylin talked to the board in February about resurrecting the Dayton Oracle SIG. He has been recovering from health problems and will soon be able to take up the effort again.

**Secretary**—Gladys Campion

Gladys presented the Minutes for the previous board meeting. Debra McFall moved the Minutes be accepted. Ken Phelps seconded and the motion passed with Gladys abstaining.

**Treasurer**—Pat Flynn

See report (sidebar on the right➡):

#### COMMITTEE REPORTS

**Audit**—Gladys Campion

On hiatus until January 1.

**Bylaws Review**

Proposed bylaws changes were published in the April DATABUS and announced at the April meeting.

**Fund Raising**—Peter Hess

No report.

## —How to Point Your Satellite Antenna Dish Properly—

By Gregg BRUCH, Vice President, Idaho Technology Users Group

[www.idahopcug.org](http://www.idahopcug.org)

**D**ISH ANTENNÆ are used for signal reception from geo-stationary satellites located at fixed positions in the sky. The dishes typically are of one of two varieties, large or small. The small dishes most often are used for residential TV reception of streaming signals from either DISH or Direct TV subscriptions, using receivers provided by the companies for the purpose. Most often the antenna dishes are mounted and pointed by technicians at the time of initial installation. Usually repointing is not necessary unless the antenna is moved for reasons such as re-roofing, line of sight interference, use at another location, etc. Large dishes generally are for commercial use but are also subject to initial or occasional move-pointing for signal reception. There are numerous geo-stationary satellites (and relatively close together) used for signal transmission, each with its many signal channels and specific formats for signal reception.

Dish pointing can be a daunting task since the satellites are not visible to the naked eye. Steps to be followed for pointing include:

- ✓ Obtain information from your signal supplier as to satellite name, channel for desired signal, and format-setup information for the receiver.
- ✓ Obtain Azimuth and Elevation data for the satellite in angle degrees. In the case of large dish antennæ, the skew (rotation) angle of the sense-element also will be needed. Several Internet sources for pointing data can be found with a Web search the using satellite name. Two such are: [EDITOR'S NOTE: Merely click on the links below. They both have been tested.]

[http://www.groundcontrol.com/Satellite\\_Look\\_Angle\\_Calculator.htm](http://www.groundcontrol.com/Satellite_Look_Angle_Calculator.htm)

<http://www.satellite-calculations.com/Satellite/lookangles.htm>

Generally, these will need inputting: the pointing calendar- day desired, along with Latitude, Longitude, and Elevation, as inputs to give the desired information for pointing. Some Web sites allow direct GPS assisted locating rather than use of the antenna Latitude, Longitude and Elevation.

Adjust the dish to the foregoing location-data and look for the signal with the receiver. If not found, try minor adjustments in the angle inputs. With a signal, then use the receiver's signal-strength output to obtain maximum reception signal-strength by the dish's angle adjustments.

The dish elevation angle usually can be set using a small carpenter's level and a protractor, tapping a string from top to bottom to simulate the face of the dish. The Azimuth most often is approximated with a magnetic compass and noticing a distant landmark on or near the needed azimuth. Then point the dish toward the object. The second Web site above also will give the time of

**Next Board Meeting**

The next Board Meeting will be 7:00 P.M. on Monday, June 4, 2018 at the Fairborn Fire Station #2, 2200 Commerce Center, Fairborn. Those who want to join us for dinner should meet at 6:00 P.M. at Hothead Burritos, 1171 East Dayton Yellow Springs Road, Fairborn.

Fairborn Fire Station #2 has been reserved thru June 2018.

Glady will try to reserve the meeting room at Donato's for future meetings.

**Dayton Diode lease with K12 & Tejas Gallery**—Brent Kerlin, Peter Hess

Dayton Diode lease has been signed with K12 Gallery and Tejas. Classes should begin soon.

**Holiday Dinner**—Glady Campion

Glady gave a final report to the board. Comments from attendees indicated they liked the variety of door prizes this year.

**ThinkTV Auction in April**—Gary Turner

Gary Turner will ask about the results from the Pi kits we donated, such as the number of bids and the amount of the winning bids.

**Summer Picnic**—Martin Arbagi

Martin reserved shelter #3 at Indian Riffle Park for August 18. Suggestions were made to increase advertising and to plan activities for the afternoon.

day that the sun and satellite are directly vertical from each other. *Use sufficiently darkened goggles to view the sun* at this actual time for Azimuth pointing. A more accurate method is to use a vertical post or stick and mark the sundial type shadow line (at the precise time of day given) on the ground as a reference line for the desired Azimuth. Then use two equal-length long strings, one end of each taped halfway up the sides of the dish and then stretched out fully and tied together at the other ends. This will give the existing Azimuth of the dish for comparison with the desired Azimuth as shown by the marked off ground-shadow of the post.

## Have a business card? Are you a DMA member?

**A**NY PAID-UP MEMBER of the Dayton Microcomputer Association is entitled to a *free* business card-sized advertisement in THE DATABUS. Send a good-quality image to [Editor@DMA1.org](mailto:Editor@DMA1.org), or give your business card to **Martin Arbagi**, the Editor, at any DMA meeting. We can embed a link to your Web site (if you have one) in the image of your card. Under weird IRS regulations, your Web site may not include discount coupons for DMA members, although discount offers may be included in the advertisement *itself*. See the example below, which includes a member discount. But the advertiser could not put the discount on his Web site.
