## October Meeting: **BILL HILL**

IT Security, Sinclair Community College

*November:* NANCY CHRISTOLEAR on Open Desk

**Y**IKES — this issue is late! The Editor has been having trouble with his local area network, otherwise known as his spinal cord — most likely a pinched nerve that renders his right arm almost useless. In any case, we apologize. The intermittent cable will be repaired, and we promise to have the next issue of *The Databus* out on time.

Those of you who didn't come to the October meeting missed an excellent presentation from DMA member **Bill Hill** on computer security. It was scary too. One attendee said that after hearing Bill's talk, he'd called off plans to increase his use of Internet banking.

But you have plenty to read within. There's news about the DMA Holiday Party on page 3. And we're catching up on the Minutes for the Trustees' meetings, with those for August and September. Remember that even under normal circumstances, Minutes are always a bit late because Trustees must approve the Minutes for the *previous* month at the *next* month's meeting, and there usually are corrections and additions. Bob Click's "Deals Guy" column follows on page 9, and we finish with "Smart Tips," courtesy of our friends at *Smart Computing* magazine on page 12. Enjoy!

# The Dayton Microcomputer Association<sup>®</sup>, Inc.

Post Office Box 4005  
Dayton, Ohio 45401

ESTABLISHED IN 1976, DMA is a group of Dayton-area professionals and hobbyists in the field of computing and information technology. General membership meetings are usually on the last Tuesday of each month. DMA has a number of Special Interest Groups (SIGs) in areas ranging from digital photography and geneology to the Linux operating system. Each SIG meets according to its own schedule. Please visit our [home page](#) to learn more about us. DMA is a member of APCUG and ASC. (Click on the logos below.)

## Submissions ...

THE DATABUS welcomes compliments, complaints, suggestions, and especially articles. We can accept articles in ASCII, or as attachments in Microsoft Word or Works, Open Office Writer, Word Perfect, or even WordStar! No PDF files, please. Send e-mails to:

Editor@DMA.org

All articles are subject to editing for spelling, grammar, usage, and space. Always retain a copy of your work, as THE DATABUS cannot be responsible for loss. When articles are of roughly equal quality, those by paid-up DMA members receive preference.

All registered trademarks, for example, Blu-ray, Excel, IBM, Office Depot, Ricoh, or *Smart Computing*, are the property of their respective owners. However, for better readability, the Registered Trade Mark symbols (®) have been omitted.

The Editor of *The Data Bus* sometimes comments on articles. Such editorial comments are enclosed in square brackets [like this] and have “ — TDB Editor” at the end.

---

## IN & AROUND DMA

---

### Annual Holiday Dinner! December 14 — \$26 per person

**W**ELL, IT MIGHT NOT BE QUITE AS SPECTACULAR as the picture above, but the Holiday season is almost upon us, and DMA's annual shindig will take place on **Tuesday, 14 December**, at the **Knights of Columbus**

**Hall, 267 Bainbridge Street, Dayton 45402** (near the Main Post Office on 5<sup>th</sup> Street). Click [here](#) for a map. Cocktails (cash bar) served at 6:00 P.M., and dinner begins at 7:00. Menu to be announced, but there will be a round of beef where you can get your meat custom-cut (rare, medium, or well-done). Tickets are available from **Jim Ullom** at the October and November meetings.

Editor's Note: This is a "catch-up" issue, with Minutes for the August and September Trustees' Meetings. Secretary MARTIN ARBAGI did not attend the August meeting because of a family gathering in Connecticut, so DMA President GLADY CAMPION took the Minutes in his place. Thanks for filling in, Gladly!

## **Minutes of the DMA Board of Trustees Meeting**

**August 2, 2010**

### **CALL TO ORDER**

Meeting was called to order at 7:07 P.M. by Gladly Campion.

#### **TRUSTEES PRESENT:**

Gladly Campion, Nancy Christolear, Gary Turner, Jim Ullom, Ron Williamitis.

#### **TRUSTEES ABSENT:**

Martin Arbagi (excused), Doug Bell (excused), Ken Phelps.

#### **OTHER OFFICERS PRESENT:**

Grant Root.

#### **VISITORS:**

Lillian Rudolph

### **OFFICERS' REPORTS**

PRESIDENT (Gladly Campion): No report.

VICE PRESIDENT (Grant Root): No report.

SECRETARY (Martin Arbagi absent):

Trustees reviewed the minutes of July 12, 2010 that were prepared by Martin Arbagi. Ron Williamitis moved the minutes be approved as corrected. Jim Ullom seconded, and the motion passed.

TREASURER (Nancy Christolear):

Nancy Christolear presented a financial report for the month. Gary Turner requested a reimbursement of \$120 for Hamvention, stating that he had been charged for one ticket in addition to the \$100 for the booth. Nancy moved that the reimbursement to Gary for Hamvention be increased to \$120. Jim Ullom seconded, and the motion passed.

### **COMMITTEE REPORTS**

AUDIT (Gladly Campion):

No report.

FUNDING (Ron Williamitis):

No report. Gary Turner suggested that we consider a fund-raising dinner at Appleby's. If we make arrangements with the restaurant 30 days in advance, print and distribute flyers, Appleby's will credit the organization with 10% of the proceeds for each customer who presents the flyer. Gary will get full details.

MEMBERSHIP (Dave Lundy, Gladly Campion):

DMA has 144 Regular, 4 Associate, 3 Student, and 2 Life members. There were 38 attendees at the July meeting, and we netted \$31 for the 50/50 raffle. Four of eight Trustees attended.

NET ADMINISTRATION:

All is well with the website and email.

PROGRAMS (Jim Ullom):

July's "webinar" with Gene Barlow went well, even though the communications were a bit rough at times. Attendees took advantage of the special prices. Dayton Diode is scheduled to talk about their SIG for August. Martin will do a presentation on desktop publishing in September. Jim is trying to schedule Bill Hill to talk about Computer Security in October. Nancy Christolear offered to do a presentation on "Open Disk" in November.

PUBLICATIONS (Martin Arbagi absent):

No report.

## **OLD BUSINESS**

DMA PICNIC:

The committee includes, Martin, Gary, Lillian, Ron, and Nancy. They met at Martin's home and worked out most of the details. Gary currently has tickets available for sale. Martin will be buying food. Nancy is planning activities.

PyOhio (Gladly Campion):

Catherine Devlin and her team organized the two-day event at Ohio State in Columbus last weekend. There were plenty of seminars, "sprints" workshops, and lightning talks. Catherine, Gladly, and Jim March attended.

Trademark (Gladly Campion):

Our application to the State of Ohio was returned for lack of a month and day on the date first used. Gladly will correct and resubmit the paperwork.

MVCS Fall Joint Meeting (Gladly Campion):

Scheduled for Wednesday, September 22, in Earley Auditorium at Sinclair, the topic is Cloud Computing. Don Corbet, Matt Hester, and Dan Forshaw are on the panel of speakers. Gladly will email copies of the brochure as soon as it is available.

## **NEW BUSINESS**

Annual Meeting in September (Gladly Campion): Gladly and Nancy will give reports on the state of the club. We will also be electing Trustees. We currently have one open seat on the Board. Martin Arbagi, Jim Ullom, and Gary Turner have terms that expire in August. Martin and Jim have served two consecutive terms and are required by bylaws to step down for one year. Gary intends to run for re-election. Notices will go out to the membership to search for nominees.

Branded Merchandise (Grant Root): Grant Root suggested we design a few pieces of branded merchandise through an online supplier like Café Press. Grant volunteered to establish an account and upload the artwork so members can order merchandise if they want. Some percentage of the proceeds may be credited to the club.

## ADJOURNMENT

Ron Williamitis moved to adjourn at 8:21. Jim Ullom seconded, and the motion passed.

Respectfully Submitted,

*Glady Campion, Acting Secretary.*

**Minutes of the Meeting of the Board of Trustees of the  
Dayton Microcomputer Association<sup>®</sup>, 13 September  
2010.**

The meeting was called to order at 7:15 P.M., by Glady Campion, President.

## TRUSTEES PRESENT:

Martin Arbagi (Secretary), Glady Campion (President), Nancy Christolear (Treasurer), Ken Phelps, Gary Turner, Jim Ullom

## OFFICERS WHO ARE NOT TRUSTEES PRESENT:

Grant Root, Vice-President

## VISITORS:

Viki Blommel (of the Oracle Special Interest Group), Jim Dalley, Greg Moran and J. Simmons (of the Dayton Diode SIG), and Wynn Rollert.

**DEATH OF RON WILLIAMITIS**

Martin Arbagi, who had spoken with Mrs. Williamitis, briefed the remaining Trustees on the sudden and untimely death of fellow-trustee Ron Williamitis the previous day (Sunday morning, the 12<sup>th</sup>), and about preliminary funeral arrangements.

**ORACLE SIG**

Viki Blommel reported on a recent meeting of the Oracle SIG. Several of the speakers were employees of the Oracle Corporation, and Oracle made other contributions to the meeting. There was some discussion as to whether corporate contributions — even though they are made to a SIG, and not to the parent organization (*i.e.*, DMA) — would endanger DMA's 501(c)(3) status.

**OFFICERS' REPORTS**

## PRESIDENT (Glady Campion):

Glady introduced Jim Dalley, a candidate for Trustee in the election at the September meeting. Jim had already forwarded a résumé to the Trustees.

The Affiliated Societies Council held its Executive Meeting on Wednesday, 8 September. The Delegates' Meeting was on 29 August.

VICE-PRESIDENT (Grant Root):

Grant was asked to forward a message to two SIG leaders whose DMA memberships have expired. Although SIG *members* are not required also to be part of DMA, SIG *leaders* are expected to maintain membership in the parent organization.

SECRETARY (Martin Arbagi):

Jim Ullom moved acceptance of July's Minutes, as taken by Gladys Campion, in the (excused) absence of Secretary Martin Arbagi. Seconded by Martin. Passed unanimously.

TREASURER (Nancy Christolear):

Nancy passed out the financial report for last month, and a proposed budget for 2011.

## COMMITTEE REPORTS

AUDIT (Gladys Campion):

Gladys has started to assemble data and put numbers together.

FUNDING:

The chair of this committee is now vacant with the death of Ron Williamitis.

MEMBERSHIP (Gladys Campion):

No report. Gladys will submit one via e-mail.

NET ADMINISTRATION (Gary Turner and Ken Phelps)

No report.

PROGRAMS (Jim Ullom):

Martin Arbagi will give a presentation on typography for September. A possibility for October's meeting is Bill Hill, who is now with Sinclair Community College's security staff (kampus kops).

PUBLICATIONS (Martin Arbagi):

The July issue of *The Databus* was published.

WIRELESS DAYTON DAYS (Peter Hess):

No report.

## OLD BUSINESS

PICNIC:

Plans are on schedule. Martin will begin buying food this week

## NEW BUSINESS

MIAMI VALLEY COMPUTING SOCIETY AND ASQ JOINT MEETING:

The joint fall meeting of the Miami Valley Computing Society and the Dayton chapter of the American Society for Quality (ASQ.org) will take place on Wednesday, the 22<sup>nd</sup>. Nancy Christolear moved that DMA take a table at the meeting for \$15, and contribute a door prize worth \$25. Seconded by Jim Ullom, the motion passed unanimously.

HOLIDAY DINNER:

Thanks to (the late) Ron Williamitis, who was a Knight of Columbus, the annual DMA Holiday Dinner will take place in the K of C Hall, just behind the Main Post

Office downtown. Alcoholic drinks will be available, but we must pay a bartender \$10 per hour. Otherwise, the rental is very moderate.

**INSURANCE:**

J. Simmons and Greg Moran of Dayton Diode reported on insurance. Jim Ullom thanked them on behalf of the Trustees for all the research they have done. Although their research has been primarily for insuring the Dayton Diode workshop (or “hacker space”), it might also result in savings for DMA, Dayton Diode’s parent organization.

**DMA. ORG:**

The domain name DMA.org expires in December. Jim Ullom moved that we renew the name for five years. Seconded by Martin Arbagi. Passed unanimously.

**GOOD OF THE ORDER.**

Ken Phelps, Grant Root, Gladys Campion, Greg Moran, Gary Turner, and Martin Arbagi all passed.

**ADJOURNMENT.**

Jim Ullom moved adjournment at 9:09. Nancy Christolear seconded. Passed unanimously.

**Respectfully Submitted,**

***Martin Arbagi, Secretary.***

## The DealsGuy

by BOB (The Cheapskate) CLICK, Greater Orlando Computer Users Group

**\*USB Feedback from Last Month's Column**

I received some feedback from last month's comments about my flash drive experience. Paul Witheridge from the Sarnia, Ontario user group continued my comments about the accidental drive letter assignment being a coincidence because of the one time use to retrieve a file: he says "... except when you need to boot from that USB drive — in that case, your hard drive will be either disabled (dead or disconnected) or reordered in boot sequence on purpose — is so the desired boot drive (USB in this case) can take the necessary C: letter assignment." [I had to read that last sentence three times before it made sense. — *TDB* Editor]

I responded that I wondered why a person would need to boot from a USB flash drive, proposing that "unless you were traveling and using a strange computer, or if you B & E'd a house to borrow the use of a computer temporarily," to which he responded: "Those are two scenarios, of course. Also, a dying hard drive, a severely virus infected hard drive, and running an alternative operating system are a few more."

I "think" I'm smarter now, but Paul is very knowledgeable so I hope you get something out of his comments.

**\*More On My Ricoh Printer**

In the past, I have mentioned how satisfied I was with my Ricoh color laser printer and Ricoh's technical support. I was brought into the real world recently when the store from which I bought it, located not very far from me, closed due the loss of lease. The chain has other stores, but they are all much further away from me. Since I needed some toner cartridges, I went to Office Depot to get them, but the store doesn't carry Ricoh cartridges. Neither does OfficeMax or Staples. I was unable to find them on their Web sites, and none of the three were interested in trying to order them. Their final response to me was: "Sorry, thank you ... goodbye."

I called Ricoh and I can order cartridges from "Ricoh Direct," but they are priced slightly higher than where I was buying them, and the product would be shipped from out of town. There'd be a shipping charge unless I was a volume customer. No user group discount though, which our user group receives from "Smart Guys Computers," from whom I originally bought it, <http://www.smartguyscomputers.com> Not only that, but when inquiring about getting cartridges, I also found out that my free tech support had run out. However, the guy told me that if I had a simple question, he would answer it for me anyway; otherwise, there would be a charge. The good part is the staff answer quickly, speak English, and they know their stuff.

Actually, there is another store operated by Smart Guys Computers that I do get close to occasionally and I'll try to stock up so I won't run out of cartridges. That way I'll still get an extra discount. I don't go that direction very much, so stocking up should solve the problem, but I was surprised to learn that cartridges for Ricoh printers were so

hard to find, considering that the company has been around for years, and its printers are widely used in commercial installations.

One thing I might mention is that I have not been overly impressed with the quality of the colored pages in newsletters that I've printed. There are a few tiny lines vertically through the picture and I don't know if other brands might have that flaw too.

#### **\*Unusual Vending Machines**

I read an article in *Travel And Leisure* magazine about vending machines. It's a short article with a brief history and shows a few unusual ones. Here is the URL, you may find it interesting,

<http://www.travelandleisure.com/articles/worlds-strangest-vending-machines/1>

[The article notes that the first vending machine was built by Hero of Alexandria, a Greek mathematician and engineer who worked during the period of the Roman Empire, about A.D. 100. Hero (sometimes spelled "Hiero") also built a working model of a steam turbine. Musicians may be interested to know that Hero built the first organ. — *TDB* Editor]

#### **\*Need Some Training?**

I was able to make a connection with Robert Hodges of KeyStone Learning Systems, and he has arranged a temporary discount for my readers on their learning courses. These learning courses have a great reputation in the industry. I don't have room for listings and descriptions in the column since many different courses are available. KeyStone's Web site will give you information on the courses available, and the prices. Other user groups have featured discounts on this company's courses in recent years and speak well of the company's reputation. The following are Robert's comments about KeyStone Learning Systems:

"KeyStone Learning Systems [www.keystonelearning.com](http://www.keystonelearning.com) provides a library of video-based, Instructor-led courses, including self-paced IT Training for Microsoft Office 2007 and 2010, Windows 7, Word, Excel, PowerPoint, Access, Outlook, SharePoint, Project, OneNote, Acrobat, Crystal Reports, Visio, and many other titles. For a full list of available courses, go here

<http://www.keystonelearning.com/courses>

"Training is available either on interactive DVD, or via Online access 24x7, anywhere you have Internet, and includes beginner through advanced training, built-in exercises, quizzes, and complete KeyNotes. You can choose to take a complete course, or jump straight to specific topics of interest with full course navigation, and go back as often as you like to refresh yourself on what you've learned.

"While our experience in video-based, instructor-led learning has given us a wealth of knowledge in the training arena, we also have 20 years of experience supporting our enterprise services, including custom design, knowledge base and learning management, security compliance, and sales/marketing support."

Robert Hodges has set up a 20% discount for my readers, and that's on *any* single user course until 12/31/10. When purchasing, use the coupon code "DealsGuy" when placing your order. You are also welcome to use your credit card.

**\*What Is Starting When Your Computer Boots?**

CodeStuff Starter helps you view whatever is starting while your computer is booting. CodeStuff Starter shows you what files are being run and what registry lines are initiating them, so you can disable them from starting.

When you disable them, it should only be temporary until you see what happens. It also tells you exactly what that program does. Of course, you need to read up on this to see if it's right for you. Bob Balogh likes this one and wrote about it several months ago in his monthly "Windows Pains" column, which appears in several newsletters. He is a member of Boca Raton Computer Society <http://www.brcs.org> CodeStuff Starter can be downloaded at <http://www.snapfiles.com/get/starter.html> The program is called "Starter," and the publisher is CodeStuff.

**\*A Free Backup Utility**

I read about this one some time ago in *Bits of Bytes*, a most interesting newsletter of the Pike's Peak Computer Application Society <http://ppcompas.apcug.org> It was in the "Around The Room" comments. This is a free backup that works similar to Acronis True Image, but the person who suggested it feels it is more user-friendly. That remains to be seen because when you buy an Acronis product, you get personal help from Gene Barlow if you bought it from him. [Gene Barlow recently gave a presentation at a regular DMA meeting. —TDB Editor] Anyway, this free backup is ToDoBackup and can be acquired at <http://www.todo-backup.com> When the product is free, it is understandable that there is no tech support. It looks like the software is free for home use, but they also offer online backup for a fee.

**\*A Great Christmas Gift**

I don't usually publish an item that isn't discounted or free, but I'm making an exception this time in the interest of making you aware of a neat Christmas gift idea. I tried to contact this company asking if they would consider giving my readers a discount on their unique flash drives, but received no response to either of two messages, which is not uncommon for me these days. These sites offer the most unusual flash drives that I have seen, so I'm passing the URLs along for you to take a look: <http://tinyurl.com/y6f3ecs> and <http://tinyurl.com/ylpxze9> I don't normally use Tinyurl in the column, because some readers tell me they prefer to know where they are going when they click on a link. But in this case, I decided to use them to keep the column shorter. [Tinyurl is a great convenience, but Bob and his readers are correct. You just don't know where you're going when clicking on a Tinyurl link. I pretested both links. They are legitimate, and some of these novelty drives are *hilarious!* —TDB Editor] I saw this information in *Nibbles & Bits*, newsletter of the Orange County [California] IBM PC Users' Group, <http://www.orcopug.org> The editor, Linda Gonse, does a remarkable job with this newsletter. [And it does look good! Click [here](#) to see the professional covers, then click on the dates of issues of *Nibbles & Bits* that you wish to read. —TDB Editor]

That's it for this month. I'll have some more new product announcements on my Web site that didn't offer discounts. Meet me here again next month if your editor per-

*Please turn to the bottom of the next page.*

## —Smart Tips From *Smart Computing*—

- **Network Streaming:** If your Internet streaming is constantly being interrupted, shut down other downloads, restart the streaming application, and try again. If conditions don't improve, try restarting the stream later on. If there's a slowdown on the streaming server, the Internet, or your home network, your audio or video will stutter or freeze until more data arrive. Broadband is essential, at least for video streams. With a fast connection, you should be able to view video at its highest resolution available.
- **Photo Resolution:** Compared to a TV or monitor screen, a printed photo requires much greater resolution to deliver sharp-looking results. For example, an 8MP (megapixel) camera captures images with 8 million pixels (1MP is equal to a million pixels), which is enough detail for photos printed at sizes up to 8.5 x 11 inches. But if you tried to print a poster-size print from the 8MP image, the picture may appear blurry or pixelated. The more megapixels your images feature, the larger the prints you can create. Note that unless you plan on creating prints larger than 8.5x11, you don't need to focus on the megapixel count when shopping for a new digital camera because nearly all models offer more than 8MP.
- **Web-Connected Blu-ray Disc Players:** Blu-ray Disc players that feature Internet connectivity can stream online content anytime. Many Internet-connected BD players give you access to movies, music, photos, and more. In order to connect your Blu-ray player to the Web and your home network, you'll need a model with a built-in Wi-Fi antenna or you'll need to use an Ethernet cable.
